

Shared pathways: strongest joint evidence

Up to 15 pathways, ranked by the larger FDR across datasets

Oxidative phosphorylation	2.38 ***	2.33 ***
Parkinson disease	2.23 ***	2.07 ***
Huntington disease	1.92 ***	1.84 ***
Thermogenesis	1.92 ***	1.78 ***
Alzheimer disease	1.75 ***	1.93 ***
Epstein-Barr virus infection	1.84 ***	1.83 ***
Ribosome	2.79 ***	1.76 ***
Th1 and Th2 cell differentiation	1.96 **	1.84 ***
Tuberculosis	1.83 **	1.96 ***
Asthma	1.90 **	2.13 ***
Leishmaniasis	1.91 **	1.88 ***
Th17 cell differentiation	1.80 **	2.04 ***
Allograft rejection	1.95 **	1.96 ***
Proteasome	1.88 **	1.89 **
Human cytomegalovirus infection	1.65 **	1.70 ***
